

Dear Bob Diefendorf,

Your products, especially Super Shield, is more than what it's labeled to be. I now can see the color of roof tiles that mold was slowly covering. They color was from grey to black. You were so right in proving to me my roof could look as good as the day it was installed. That was 1932! It was also the best idea to use Super Shield on all the bricks on the side of the house . The mortar was beginning to absorb the moisture whenever it rained penetrating through the walls creating unwanted humidity. I am just totally pleased with your products and highly recommend it to everyone. And, I thank you, Bob Diefendorf, you not only saved my roof, but the whole house.

Respectfully,

David Collari
